

INTRODUCING:

MultiFIT[®]

WHEEL BALANCE WEIGHTS

Perfect Equipment[®] universal zinc clip-on weights.
The perfect solution for the workshop.

With a legacy of delivering new ideas to the industry, we have done it again.

Series 84U - Zinc Uncoated - For steel wheels

Series 63 - Zinc Coated - For alloy wheels

Made for the Aftermarket

Perfect Equipment is pleased to announce the arrival of a universal clip-on wheel weight program for the aftermarket.

SKU Reduction to Two Series

By utilizing one weight for steel wheels and one weight for alloy wheels, and pairing those with an adhesive option, you can greatly simplify your installation, ordering and inventory processes.

The Benefits of Zinc

Zinc is typically easier to install and remove than other non-lead options in the marketplace. Zinc is also used by more OEM's worldwide than any other material available today.

Providing a Universal Option

A universal wheel weight solution allows you to streamline your balance area for greater speed and accuracy.

Series 84U - For Steel Wheels

A new non-lead alternative designed for the aftermarket

Made from high quality zinc material making installation and removal easier

Works on most **P** SERIES **T** SERIES wheels.

Series 63 - For Alloy Wheels

MultiFit® weights come in larger box sizes to help reduce inventory reordering

Series 63 features a 3-year proven powder coating for corrosion protection

Works on most **AW** SERIES **MC** SERIES **IAW** SERIES **FN** SERIES wheels.

Note that it does not work on LH & EN-Series wheels - use an adhesive weight.
