- Easily and Quickly Adjustable
- All Steel Construction for Long Life
- Compact Footprint Minimizes Space Required
- Manual and Air Powered Models

## QUALITY AND PERFORMANCE THAT'S AFFORDABLE!

Branick has been making spreaders for almost 80 years. We have channeled all that experience into our line of small spreaders. You're sure to find the right fit for your shop with features like sawtooth or spring set adjustment, zinc plated rollers, air powered or gas spring assisted spread arms, and an RMA compliant gooseneck light. From the entry model 5035 to the heavier 5120, all are designed to handle any passenger and light truck tire up to 20". The 5120 can even take 22.5" tires. All include a solid 4 point base that can be bolted to the floor for added stability. If you're thinking of adding a spreader, think Branick. Manufactured at Branick's facility in Fargo, ND means you get American made quality and toughness.

Dimensions	22 W X 15 D X 45 L	22 W X 15 D X 45 L	29 W X 27 D X 40 L

\* To purchase without light order 5035-B

### Optional LED Light

Our UL listed has an IP65 rated enclosure and produces more than 3 times the light required by RMA. It will last much longer than incandescent or fluorescent lights and because it's LED it stays cool to the touch. It includes a swivel head that friction locks in place and a 7.5 foot cord.

### Optional Storage Cabinet (available on 5035 & 5045)

Keep your repair and inspection tools where you need them, at the spreader. Our optional storage cabinet attaches directly to either side of the spreader so you won't waste time searching for supplies. Steel construction to take the punishment of a shop environment.

### Optional Riser Platform (available on 5035 & 5045)

If you need a little extra height for an ergonomic position, the optional riser platform will do the trick. The platform's 3" lift brings the working surface to 39.25". Bolts directly to the base of the spreader and includes pre-drilled holes for floor mounting.
