

# Pincott®

## ULTRA SERIES BLADES

- **Exclusive Heat Treating Process**
- **Reduced Tooth Breakage**
- **Faster Material Removal**
- **Cooler Running**
- **No Blade Warpage**
- **Lower Cost Per Buffed Tire**

Introducing the complete line of Pincott Buffing Blades! An exclusive heat treating process assures a substantial increase in blade life. Users report 50% or more useful life than with competitive blades. Blade warpage has been virtually eliminated, so there are no more problems in loading the hub due to blade warpage. Pincott rasp blades leave a perfectly buffed surface that meets RMA Texture Standards. The bottom line to you is LOWER COST PER BUFFED TIRE.

Engineered by a company with over 50 years in the retreading industry, Pincott Buffing Rasp Blades are designed to fit all U.S. and European buffing machines, and are manufactured with multiple stampings to allow interchangeability between two or three pin hubs.

**Ultra I**  
**Ultra II**  
**Ultra III**
