For Inquiries Call (351) 234 941 294

To achieve maximum results it is important to use the proper package size for each tire. As a rule of thumb, the amount of Counteract Balancing Beads required per tire is based on one ounce per thirteen pounds of tire. If you are not using an applicator and pouring the contents of the bag directly into the tire it is imperative that none of the contents of the bag ends up on the bead seating area of the tire and rim. If you are using our new throw in bags, open & discard outside bag only & throw clear inner bag containing CBB directly inside tire cavity. Counteract disclaims any responsibility for air loss or tire damage due to improper installation or air check. In order to reduce the possibility of valve leaks, the use of a long valve core or valve core filter and a metal valve cap is recommended.
